Mejorar el rendimiento del pc

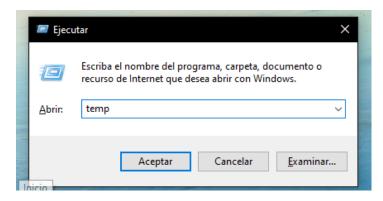

Para mejorar el rendimiento de nuestra pc temos que seguir los siguentos pasos:

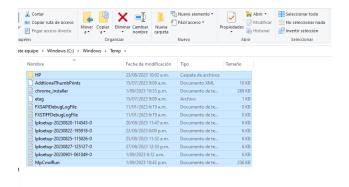

Le damos windows + r

Escribimos "temp"

Selecciona todo con control + E

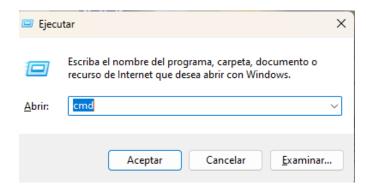

Le damos en eliminar

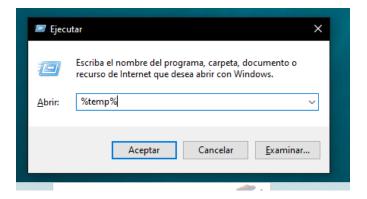

"%temp%"

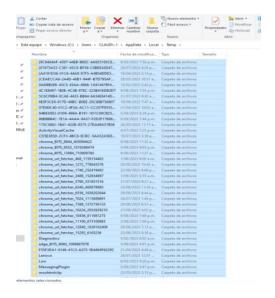

Le damos en Windows + r

Escribimos "%temp%"

Lo seleccionamos todo con control + E

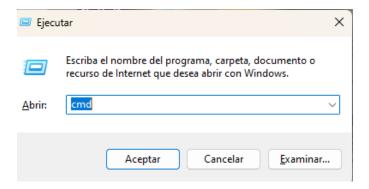

Le damos en eliminar

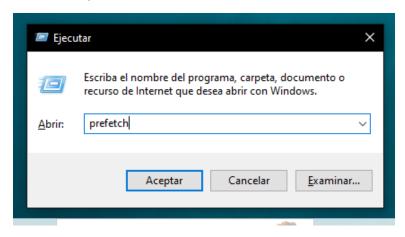

Le damos en Windows + r

Escribimos "prefetch"

Seleccionamos todo con control + E

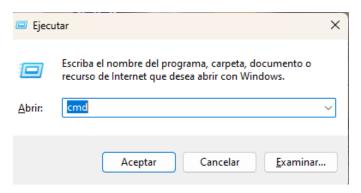

Y le damos en eliminar

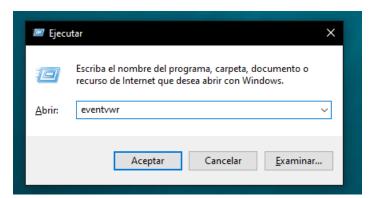

"eventvwr"

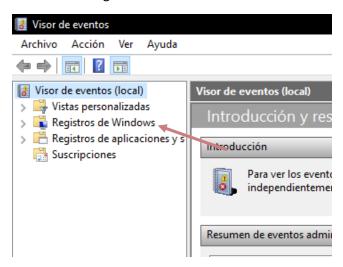

Le damos en Windows + R

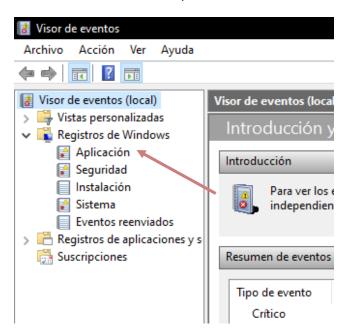

Escribimos "eventvmr"

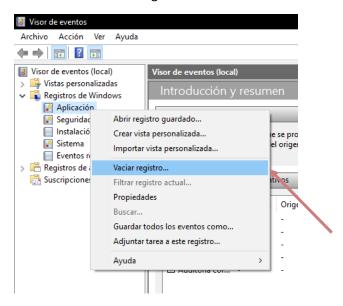

Le damos en registro de Windows

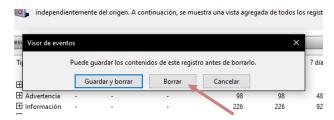

Le damos click derecho en aplicaciones

Y le damos en vaciar registro

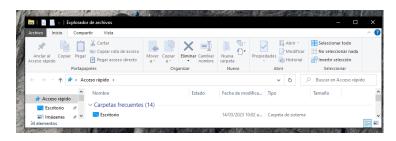

Y le damos en borrar, y hacemos lo mismo con cada uno de los registros de Windows

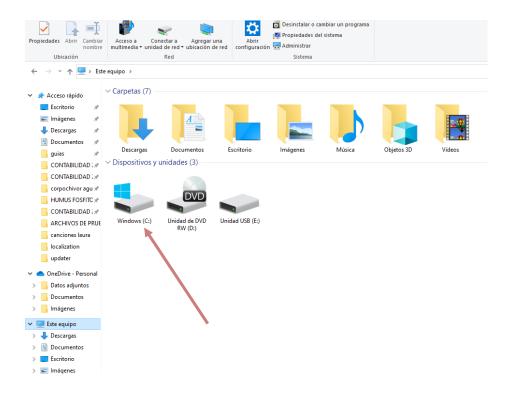

"liberar espacio en el disco duro"

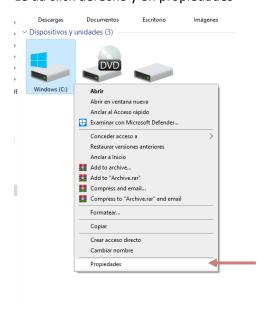

Primero le damos en Windows + E

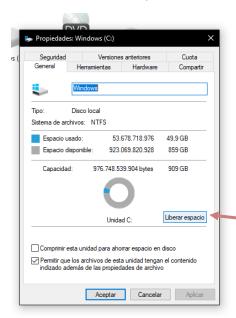

Vamos a este equipo y le damos en Windows C

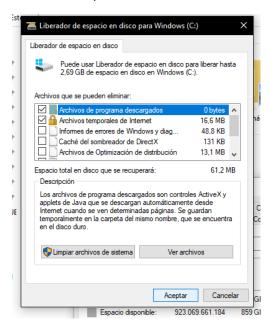

Le da click derecho y en propiedades

Le damos en liberar espacio

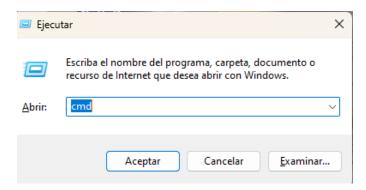

Le damos aceptar

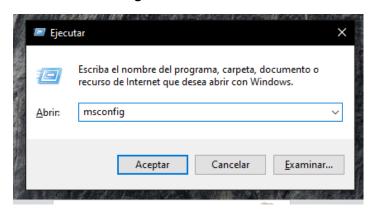

Acelerar nucleos

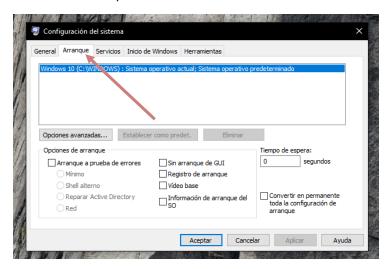

le damos en Windows + R

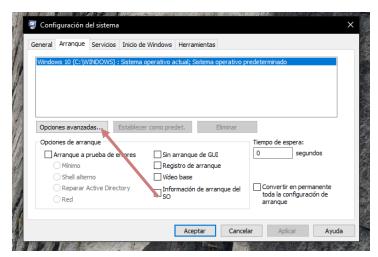

Escribimos "msconfig"

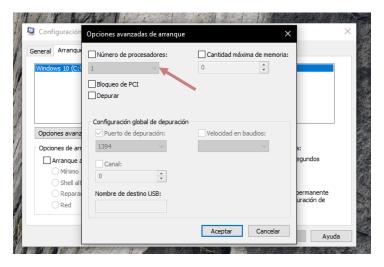

Selecciona arranque

Presione opciones avanzadas

Y selecciona las cantidades de núcleos en numero de procesadores y le da aceptar

Y finaliza en aplicar
